Goshen Home Care Home Advantage

- No long hallways or large dining halls to navigate
 - Caregivers are educated on all stages of Alzheimer's, Parkinson's & Memory loss.
 - Residents participate in local program activities
 - Safety and security measures in our home, including key pad access on exit doors, motion sensors and safety bars in bathrooms.
- The real-home environment at Goshen Home allows us to provide residents with activities and comforts not found in traditional big box facilities. Our houses capacity averages between 6-12 people, creating a warm and inviting atmosphere that encourages natural interaction and the development of meaningful friendships. Goshen Home staff has a deep passion for memory care and truly love getting to know the residents. Their commitments mean our staff stays consistent, so residents and caregivers are able to form close bonds.

GOSHEN HOME CARE

Caring Hearts, Exceeding Expectations

Welcome to Goshen Home Care

At Goshen Home Care we are proud to offer small residential memory care homes. Here, care givers cater to each individual's specific needs in order to create moment of joy on a daily basis. Goshen Home accommodates no more than 12 residents at a time. We understand that families want to be involved in their loved ones' care so our nurses and caregivers make it a priority to keep you informed and provide excellent communication.

Owner/Operator Monica Kangethe is available by phone 24/7. Call us anytime at 913-296-3136 and discover the difference.

Memory Care

The staff at Goshen home are trained to assist residents living with all stages of Alzheimer's, Parkinson's and memory loss.

Our innovative memory care philosophy of helping residents "living in the moment" enhances the lives of all residents by making every day meaningful and fulfilling. Our aim is to provide residents with a sense of familiarity and belonging while maintaining independence for as long as possible.

Goshen Home is limited to no more than 12 people. This enables us to provide the most individualized care, focusing on memory related activities that stimulate the brain and encourage independence and participation in daily life around the house. Friendships and conversation flow naturally in the absence of large crowds, long hallways and noisy dining areas.

All of our caregivers are state-certified as certified Aides, Medication Aides, or Licensed Nurses.

Our Caring Hearts

We understand that when it comes to memory loss, "a caring heart" in addition to living in the moment, is everything. This gives residents real meaning each day, purpose and joy. As it's the meaning of Goshen, residents and their families experience Peace, Rest and Comfort. This sets us apart from all others. Our residents enjoy activities in and around the home, outings into Kansas City area and neighboring churches. Come and try our one meal on us!

Meet Monica Kangethe

I began as a certified nurse aid in Seattle, Washington in 1997, transitioning from being a Librarian. I later changed my entire career into nursing when I lost my firstborn son to Cancer.

My grandmother had Dementia and I experienced caring for her at home. My son and grandma both changed my career path completely and through the experience of caring for them, I went back to school to become a nurse. I am a registered nurse with a Masters Degree in Nursing (ARNP) and have worked with seniors since 2007. I have been a Nurse Educator, Assistant Director of Nursing and recently moved from being a Director of Nursing in an Assisted Living facility for 5 years, a facility that experienced excellent clinical surveys during my leadership years. I am very experienced in caring for residents with Dementia and this has inspired me to care for residents in a home setting and offer more personalized care that is lacking in large institutionalized facilities.

In September 2019, I founded Goshen Home Care. It's a home that offers care for folks dealing with Dementia, Alzheimer's and Parkinson's Disease. Goshen Home Care residents age in place, residents dont move out when care increases.

.We pride in our nurses providing direct care to our residents. Teamwork makes the dream work. at caters to each individual's needs to create daily moments of joy.

At Goshen Home Care, we have caring hearts and exceed expectations. It is certainly a place of Peace, Rest and Comfort.

GOSHEN HOME CARE
Caring Hearts, Exceeding Expectations

Health and Wellness

Our goal at Goshen is to provide memory care residents with individualized attention and care during all stages of their memory loss. We get to know your loved ones on a personal level and understand their needs and routines in order to keep them active and stimulated so they can live with purpose on a daily basis.

The health and wellness of our residents is our top priority. We provide medication management and help with diets by certified professionals. Staff is trained on caring for memory loss at all stages. Doctors and nurses are available around the clock 24/7.
